Welcome to My Profile!

I specialize in **Front-End Development** with strong skills in **React.js, HTML, CSS, and JavaScript**, combined with programming expertise in **C++** for problem-solving and a solid understanding of **Python libraries** for data modeling. Currently, I am expanding my knowledge in **Node.js** to grow as a full-stack developer

Quick Guide

- Skilled in building **responsive, user-friendly web applications** using **React.js, HTML, CSS, and JavaScript**.
- Strong foundation in **C++ programming & problem-solving** (Data Structures & Algorithms).
- Passionate about creating **modern, interactive, and efficient web solutions** with clean code and performance in mind.
- Knowledge of **Python libraries (NumPy, Matplotlib, etc.)** for data analysis and modeling.
- Currently learning **Node.js** to strengthen back-end development skills.

Education

Dr. APJ Abdul Kalam Technical University, Computer Science Engineering (Artificial Intelligence)   Sept 2023 – June 2027

- B.Tech. - GPA: 8.62/10.0 (a link to somewhere ↗)
- intermediate - 85
- Highschool - 89.83

Experience

Front-End Developer (Project Work)

- Developed responsive websites using **React.js, HTML, CSS, and JavaScript**.
- Built a **personal portfolio website** showcasing skills and projects with clean UI design.
- Created so many **mini project platform (wedding planer, Nivaran, Eazy-rent)** projects.

Programming & Problem Solving (C++)

- Implemented solutions for **arrays, strings, recursion, sorting, and searching problems**.
- Created a service to provide gradient across VS and VS add-ins, optimizing its performance via caching
- Currently learning **Node.js** to understand **server-side development** and backend integration.

Projects

Eazy Rent   github.com/name/repo ↗

- Eazy Rent - Rent Anything, Anytime Eazy Rent is a web-based platform that lets users rent and hire items with ease.
- Tools Used: HTML, CSS, Javascript

Event Management

- Wedding Planner Website A responsive and user-friendly platform for seamless wedding planning. Manage guest lists, budgets, timelines, and vendors in one place.
- Tools Used: HTML, CSS

Nivaran

- Nivaran is a platform designed to help local people raise awareness about social issues and escalate them to higher authorities.
- Tools Used: HTML, CSS

Technologies

Languages: C, C++, Python, JavaScript

Technologies: Fullstack development, DSA
